PROJECTS

Wireless CRM

CRM is a customer relationship management tool that has come a long way and has incorporated workflow automation, campaign management, and reporting as integral parts. This application is the perfect example of the same where the Application manages process flow along with the client, campaigns, Deals, Payments, Tickets, leases, and everything else from a single portal.

My Roles and Responsibilities:

- Develop the features laid out in the Sprint.
- Update the status of the software project to the Project Manager or Tech Lead.
- Estimate the amount of time needed to deliver a given task.

Ghostly

One of the key problems in the hospitality and restoration industry and in Food Provision & Delivery Industry (FPDI), in extended way, is to manage the provisioning of food in a Sustainable, Predictable and Optimized way looking for:

• Diminish the Food Waste

• Provide predictability for suppliers, for all the stakeholders involved in the supply chain, form producers

Ghostly Kitchen's vision is to maximize the usage of Information Technologies (IT), especially Artificial Intelligence (AI) to achieve mentioned goals.

My Roles and Responsibilities:

- Ghostly is mainly DB related Project so my main responsibility is to maintain database, design database and write S.P. (Store Procedures).

certificate) from Coursera where I lean Git, GitHub Lab, and Azure.

-**Pre-Eureka 2017**: A road Entrepreneurship An event Organize by IIT Bombay where I will learn how to understand the business and what are basic things to run the business.
